Hello,

I'm a concerned citizen regarding the US patent system. Our current system is very onerous on smaller businesses and individuals that need to defend their patent rights. When the system no longer helps the little guy but instead hurts them we all lose.

Rather than a small claims court, there should be a small entity court that enables a small entity to defend its patent rights. It needs the due process of an Article III Court but must be faster and less expensive to truly make a positive difference.

Thank you for considering this email.
